

# UNIVERSAL LIGHT SUPPORT

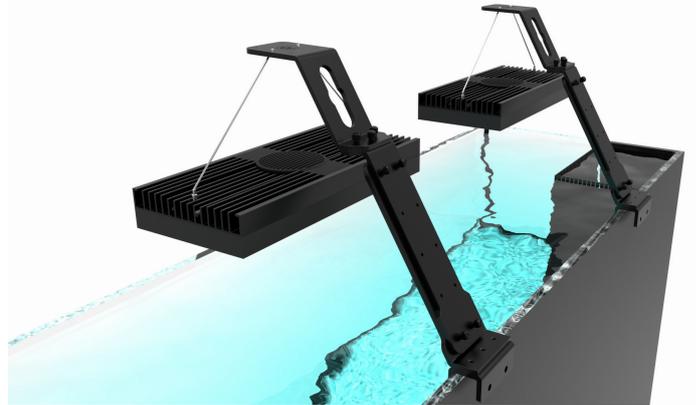

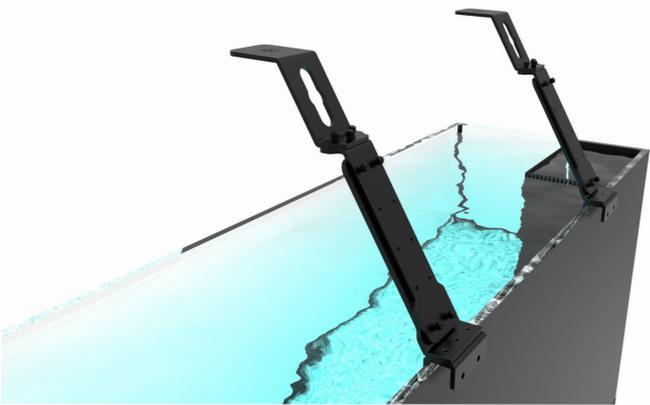

Brand: Bananaquarium  
R.R.P.: € 59,00

## THE BANANAQUARIUM ULS

Suspending any and every lighting brand, system and type

### BANANAQUARIUM ULS OVERVIEW

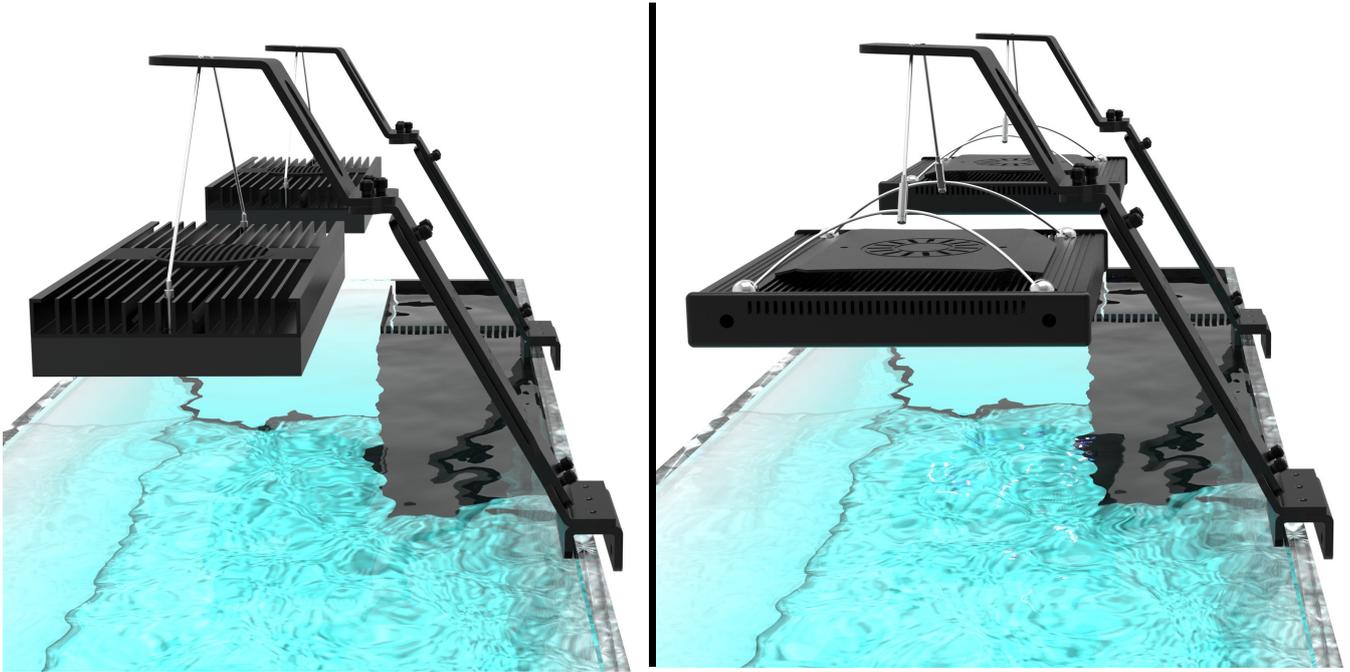

The bananaquarium ULS is the only lighting support system that is able to suspend any and every lighting system and type. The ULS makes clever use of the ability to mount a light system to the ceiling, through either additional suspension kits or the included suspension kit.

# UNIVERSAL, TRULY.

The ULS is designed to enable the aquarists to suspend their own preferred lighting brand and system, without being limited by the support system supplied by the brand of the lamps. The ULS is designed with an "industrial" look, making it a modern looking product.

The ULS is making clever use of the possibility to mount a light to the ceiling, thus embodying the cables that are either standard with the light system or the ULS. The ULS is a dynamic design that will look natural on all aquarium sizes.

## EASE OF USE

The Bananaquarium ULS is very user-friendly. It embodies the potential for your light to be suspended to the ceiling, yet it is more convenient to use the ULS than it is to use your ceiling. In just a few minutes you can enjoy your aquarium, lit by the lights suspended with the Universal Light Support

## FEATURES

- Aquarium requirements to fit the Universal Light Support:
- Glass thickness (or a combination) of: 0 - 25 mm
- Aquarium depth (front to back): 400 - 650 mm
- Suitable for type of aquarium:
- Fresh water
- Salt water
- Brackish water
- Can mount any lighting system which is suitable to be suspended from the ceiling.
- Max light weight (recommended)  
<10mm glass thickness: 3.0 kg  
10mm and up: 4.5 kg (heavier is possible, but on your own risk and depending on glass thickness)
- Support weight: +- 550 grams
- Requires no maintenance after installation
- Best price to quality ratio
- Clean look, straightforward design
- Great solution for aquarium cable management!
