

# Plant Pro Fe7

Plant Pro Fe7 is a powerful high concentrated complete fertilizer. Rich in assimilable Iron Fe2, manganese, and potassium, it offers fast growing, very demanding plants a full range of micro and macro-elements, ensuring a healthy and lush growth.

Highly effective for red plants such as Ammania's Alternanthera's, Rotala's, Nymphaea's, or all other fast growing plants. Stabilized plant fertilizer formula, no addition of nitrates or phosphates. Amazing results when combined with Carbo Green.

**User Instructions** : 1 x per week a dosing cap = 7,5 ml per 60 L aquarium water. Depending on the plant species or density, can the dosage 2 X per week be administered. With daily use : 7 drops per 60 L. Shake well before use.

**Safety measures** : Keep at room temperature. To be used only where there is a recognised need. Do not exceed the appropriate dose rates. Keep out of reach of children.
