

Strontium

Highly-concentrated Strontium solution.

Increases efficiently and safely the concentration of Strontium in marine aquarium water to provide corals and reef-building invertebrates with one of the most important elements required for their growth. Optimal values are 8 mg - 10 mg.

Free of phosphate, silicate, nitrates or other organic material. Formulated by a German biologist.

User Instructions : weekly 1 dosing cup (15 ml) per 200 liters. In aquaria with a high population of SPS and LPS aswell as calcereous algea add every 4 - 5 days 1 dosing cup per 200 liters. Distribute the Strontium at the outlet of the pump. Shake well before use.

Safety measures : Keep out of reach of children. In case of direct contact with skin or clothes, rinse immediately.
